ABOUT SOA PROXIMA

The curtains fell on the 5th edition of SOA Proxima, the HR Conclave organised by Siksha 'O' Anusandhan (SOA) Deemed to be University, on April 27th, 2024. Held over the span of two days, the event emerged as the largest such conference ever held in India.

It went beyond just linking tech talent with industry leaders. SOA Proxima 2024 built bridges to a strong and bright future.

The event provided the platform for forming long-term mentoring programs. The students were provided with pro-bono counselling by various professionals in diverse fields enabling them to make informed decisions in their careers, develop their skills, and advance professionally. Valuable guidance for students in their journey from academics to a full-fledged career was provided, and a sense of community was nurtured. Students unveiled a dazzling array of cutting edge technological projects, igniting the stage with their innovative prowess and visionary creations.

Acquainted with the continual development in the digital sector, SOA Proxima 2024 sponsored skill workshops designed to bridge the gap between technological and scientific research and industry needs. It is therefore against such observation that similar initiatives for collaborative training were developed. Therefore in this case, the colleges may be prompted to create their curriculum in a way that incorporates the latest demands in the business world thus ensuring that graduates from such colleges have the most sought after skill sets. It took an organised effort to push these ideas forward at the conference, specifically in the tech field.The panels and workshops aimed to create a 'safer' space for individuals from different backgrounds and genders, ensuring fairness in the sector and maximising the diverse talents available, thus boosting innovation and creativity in problem-solving. Also, safer can be emphasised using bold or italics rather than quotes. SOA Proxima 2024 didn't just focus on traditional employment opportunities. Recognizing the entrepreneurial spirit amongst students, the conference hosted sessions and workshops on building startups and navigating the world of innovation.This not only empowers students to become job creators but also fosters a culture of entrepreneurship within the country.

The event also featured other critical elements regarding market information and innovation. It created an opportunity to showcase the extent of talent available in India, giving learners a chance to interact with top executives from various organisations about potential future decisions.The success of the event has impacted the youth in multiple ways. Their misunderstandings about the corporate world have been resolved, and their self-confidence has increased. Stated differently, the SOA PROXIMA has provided a learning platform for both corporate leaders and students and will continue to do so in the future.Our hearts are warm with chuffed embrace through unmeasured guidance and unconditional support by the dedicated faculty members who contributed to the resounding success of SOA Proxima 2024. These individuals, including Dr. Ripti R. Dash, Prof. Renu Sharma, Ms. Anukampa Behera, Ms. Rohini Barik, Dr. Md Abdul Razque, Mr. Abhishek Patnaik, Mr. Sumit Mitra, Mr. U T B Dora, and Dr. Satish Kumar Samal, poured their dedication into SOA Proxima 2024, and we owe them our sincere appreciation. Their invaluable help and time spent at SOA Proxima are gratefully acknowledged, alongside the efforts of the entire SOA Proxima team.

ABOUT SOA PROXIMA

Dr. Ripti R. Dash, Director of Corporate Relations, SOA University, was the cornerstone of this year's Proxima event. His unwavering dedication and determination set the gold standard for success. Dr. Dash's relentless follow-ups, innovative strategies, seamless multitasking, and exemplary leadership were invaluable assets, propelling both the behind-the-scenes efforts and the on-stage performances. His approachable demeanor and genuine engagement with students and volunteers created an environment of mutual respect and learning, making him a pillar of support and inspiration for everyone involved. He was the guiding star of the event, the anchor that kept everything steady and on course.

Mr. Abhishek Patnaik (Sr. Manager Corporate Relations, SOA University) stood as the pillar of strength for the entire team who together made the conclave a star. His efforts have substantially contributed to the quality of every interaction, and his professionalism has overwhelmed everyone who has looked up to him. From 'day one' to 'one day to go', everything seemed effortless with his vision.

Prof. (Dr.) Renu Sharma, the Additional Dean of Student Affairs at SOA University, played a pivotal role in the success of the event. Her leadership and meticulous planning ensured that every detail was executed flawlessly. Ma'am was always there whenever there was any need of suggestion and betterment.

Prof. Anukampa Behera, Professor and DevOps-AI and ML Researcher at SOA University has been the soul of the event. Prof. Behera's empathetic, nurturing approach made her the most go-to person and an unparalleled point of communication for her students.

Mr. UTB Dora, the Director of Corporate Relations at SOA University, significantly contributed to the event's success through his strategic vision and professional acumen, which were crucial in overcoming obstacles and ensuring a seamless and impactful event. Mr. Md Abdul Razaque, Faculty-in-Charge of the Career Development Cell, SOA University, served as the pivotal contact throughout Proxima's journey, expertly managing work distribution to maximize resources. Ms. Rohini Barik, Placement Officer at ITER, SOA, provided unwavering support and benevolence, elevating the event to new heights with her remarkable guidance. Additionally, Mr. Sumit Mitra, Head of the Career Development Cell at ITER, SOA, played an essential role with his exemplary leadership and innovative approach. Dr. Satish Samal, Assistant Professor at ITER, SOA, offered invaluable insights and support, enhancing the event's overall success.

PROJECT EXHIBITON

Under the prudent leadership of Proxima Project Coordinator, Ms.Anukampa Behera and departmental coordinators of ECE ,EE and ME , Prof.Gyan R. Patra , Prof. Dr. Binod Sahoo and Prof. Dr. Sikata Samantray respectively; SOA Proxima project exhibition saw tides of innovation and convergence of beaming solutions of our problems under 40+ tech domains.

When we talk about projects that dealt with challenges in agriculture; The Krishi Sahayata project addressed challenges in the agriculture sector by facilitating the crop insurance claim settlement process for local farmers, the government, and insurance companies. It aims to bridge gaps such as language barriers, lack of knowledge, and complex processes that hinder the effectiveness of crop insurance programs, thereby providing a smoother and more accessible solution for farmers.
Developed by Sumit Dash, Om Tanmaya Pati, Sudiksha Sharma, Smriti and Chanchal Anand.
Brilliant LegalTech and AI ML projects were developed by K. Nameesha, Sunil Pradhan, and Swetparna Mishra. Legal Connect India addresses the fragmented legal services market with a client-centric e-marketplace. Juriscribe.ai simplifies legal documentation using Generative AI and Large Language Models. The project's core team included Ankit Kumar, Suhani Mohanty, Riyan Choudhary, Uditya Raj, and Partha Priyadarshi Das of the 6th semester.

Devised by Ankit Subhamjyoti, Lucky Swain, and Suraj Sahoo, SESMO improves natural disaster prediction by forecasting earthquakes and providing precise evacuation routes. Data from their hardware is sent to the cloud via AWS IoT Core for real-time analysis. Upon detection, users are notified through notifications, SMS, and flash messages.

The Spleengo project by Ratiranjan Panda and team, developed to provide affordable and practical electric bicycles. By offering cost-effective, easily maintainable bikes with long-lasting batteries, Spleengo addresses the high cost, expensive maintenance, and limited battery life of current electric bicycles in the Indian market, making sustainable transportation more accessible.
In Computer Vision, notable projects included Deduct AI by Nishant Gaurav and team, assisting law enforcement with AI/ML; Handpen by Arijeet Aman and team, improving educational accessibility; a home security object detection system using Raspberry Pi4 by Taniya Baral and team; Swift Scan, an AI-driven autonomous checkout system by Aditya Lenka and team; and Crime Vision by Rohan Behera and team, utilizing AI/ML for autonomous analysis, rapid response, and anonymous interaction.
Over 31+ innovative ideas were presented, each promising a better world. Among them were Neytri, NetGuardian, BOLTALYTICS, 3-phase protection system, smart touch-free elevator, Influx, Silent Speaks, AccessIt, Veggievator, Motion Detectives, Smart Vent Optimise, Quant-YR, Differential protection using Arduino, Home Inverter, Health Reach, Proddy, Neural Map, Sentinex, Resquibe, iPark, Urbansight, Voltage Protection, and Pragati.

SYNCING ENGINEERING WITH INDUSTRY:Bridging the Divide

In an era where technological advancements surge ahead at breakneck speed, the chasm between engineering school curricula and industry requirements is widening. Employers increasingly seek graduates who possess not only theoretical knowledge but also the practical, hands-on experience necessary to hit the ground running.

The discussion of the gap between E-School curriculum and industry demands was orchestrated by Siksha 'O' Anusandhan Deemed to be University. Mr. Mohar Manohar Mishra, Director and CTO at *Inovaare Clouds Solutions Pvt. Ltd.*, moderated the discussion.

Mr. Ashish Banka, Head (Human Capital), *Cradlewise*, opened the panel with a discussion about the value of academic scores in the employment market. He negated the statement "four years are enough to make a student market-ready".Mr. Mahesh Patil, Manager (HR, IR & Admin) at Polyrub CooperStandard FTS Pvt. Ltd., emphasised the core industry mantra of the four M's Man-Material-Machine- Method. "Research is necessary to understand the fundamentals", he advised.

To mitigate the risk of layoffs, Mr. Avinash Desai, Assistant Manager (Strategic TA) at *SISA Information Security Pvt. Ltd.* argued that individuals must prioritise skill development, effective communication, maintaining a positive attitude, and actively gathering organisational data.

Mr. Gokulakannan Narasimhan, Senior Manager (Early in Career Hiring) at *ServiceNow* concluded the discussion stating that, the emphasis lies not in pursuing specific individuals but in cultivating the capability to adeptly engage with evolving technologies.

Therefore, it is paramount to concentrate efforts on crafting a distinctive resume, optimising academic achievements, enhancing learning agility, and fostering a proactive attitude towards continuous education.

Resume Tip:

MIT Technology review tips aspirants to keep the resume simple and straightforward, with short, descriptive sentences and clear listings of skills and experiences. Avoid unconventional designs or color schemes.

Incorporate keywords from the job description throughout the resume to align with ATS scanning.

RESILIENCE– HANDLING FAILURE AND STRESS WITH GRIT AND GRACE

In today's competitive world of campus placements and job searches, resilience emerges as an indispensable ally. Siksha 'O' Anusandhan Deemed to be University hosted a deliberation, highlighting the significance of resilience and the power of perseverance. Esteemed speakers from diverse fields gathered to impart their wisdom on these virtues.

Mr. Amit Tripathy, COO of *Identity Group*, moderated the event with a thought-provoking speech that underscored the lessons learned from his failures. His probing questions on the nature of fiasco spurred a lively debate among the attendees.

Following suit, Mr. Avinna Kumar Sahoo, Executive Director of *Involead Services*, shared his perspective, stating, "Success and failure are intrinsic to life's journey.". Mr. Subarna Keshari Mishra of *KFINTECH*, stressed the value of optimism. The conversation also delved into the challenges of campus placements and job searches, addressing concerns about peer pressure and the anxiety of missing out, exacerbated by social media's influence.

Dr. Rahul P. from *MathCo* acknowledged the acceptability of student failures, contrasting it with career peaks. Mr. Venkatesh Neelam of Atlassian advocated for mentorship and defining personal success. Mr. Rahul Dixit at *Quest Global* emphasised persistence and self-mentoring, while Mr. Mohin Mohammed from *Finastra* suggested focusing on emerging fields like prompt engineering and maintaining clear priorities.

IS IT THE AGE OF HIDDEN WORKERS?

A report by the World Economic Forum titled 'Jobs of Tomorrow' highlighted the future of work, revealing that prominent jobs will require relevant skills, which can be learned even by those without college degrees.

In the late 2010s, the job market experienced a surplus of openings relative to the number of qualified candidates. Consequently, many employers began to place less emphasis on whether applicants held degrees. They recognized that a degree does not necessarily equate to possessing the requisite skills for a job.

A 2022 Harvard Business Review article suggests that this trend mostly applies to middle-skilled jobs. It reports that various companies announce the elimination of degree requirements company-wide. On the other hand, over 90% of IT job postings sampled from Oracle still required a degree, surpassing the national average in the USA at 52%.

Instances show varying degree requirements for similar roles across companies. Only 26% of Accenture's and 29% of IBM's postings for software quality-assurance engineers required a degree, whereas all postings at Oracle did.

A report by The Economic Times suggests a potential shift in the job market, with companies prioritising skills development over traditional degrees in the face of automation.

Dreams, Struggles & Triumphs

In halls where dreams and hopes unite,
We chart our paths in twilight's gleam,
With hearts aglow and futures bright.
Through sleepless nights and endless fight,
We chase the shadows of our dream,
In college days, we find our light.

The lectures bring a wisdom pure,
Our minds expand, our spirits rise,
With every step, our hearts endure.
In friendships true and moments sure,
We grasp the stars in boundless skies,
In college days, our paths secure.

When challenges come swift and strong,
We face them with a steadfast heart,
Together, we can right the wrong.
In unity, we all belong,
From every end, we make a start,
In college days, where we belong.

So here's to all who strive and care,
To every dream, to every goal,
In college life, we're bold and rare.
Through highs and lows, we'll all be there,
With strength of mind and heart and soul,
In college days, beyond compare.

And as we stand on future's brink,
With lessons learned and friendships made,
We take a moment just to think.
For in these years, we found the link,
To dreams achieved, to plans well-laid,
In college days, our spirits sync.

-ARCHISHREE MOHANTY

Chasing dreams on the road less travelled

The flames of zeal in our hearts burn bright
Pick the road not taken, and be our own guides
And even if we fail, surely we'll turn tides
Just to peek at the secrets the sun hides.

A rat race in this cut throat world
Everybody running, dreams unfurl
Gripping onto hopes as our fingers curl
Weaving our journey, and now it's burled.

Fears and doubts creep, anxiety seeps
In the mind's deep ends; shaking our belief
A wounded ankle makes it hard to leap
But a strong willpower is ours to keep.

The shadows clear as the victory shines
Leaving all if's, but's and maybe's behind
So we hold our heads high, and wear a smile
Before we sleep, we'll traverse some miles

-AYUSH K TRIPATHI

“WHEN THE DRUM BEATS, THE DANCERS MUST FOLLOW.”

In the ever-evolving landscape of modern workplaces, the concept of cultural fit has emerged as a powerful force. Cultural fit is not a checkbox on a hiring form, it’s the invisible thread that weaves through the fabric of an organisation, connecting its people, purpose, and practices.

Addressing the importance of cultural alignment, Siksha 'O' Anusandhan seamlessly integrated a sequence of discussions during the session titled “Harmonising Purpose: Fostering a Cultural Match in the Work Environment.” Highlighting the critical role of of cultural fit in the workplace, Ms. Madhura Pagar, Global Head (HR) at *Arcon Tech Solutions*, advised that skills and a positive attitude are key for job seekers and not necessarily experience. She also suggested that employees consider changing companies if the culture doesn't align, underscoring her pride in her company's empowerment program.

Introducing her agricultural products company , Ms. Shital Vikas Salunkhe, Head of HR at *CNH Industrial India*, underscored their culture: “In a team, be your best and grow together.” Mr. Vinay Srikant, Manager at *Ansys*, emphasised that upskilling is crucial during recessions and job crises. He noted that aspiring to be "Employee of the Year" requires being well-acquainted with the company culture.

Ms. Shruti S. Kumar, Senior Associate at *Publicis Sapient*, emphasised the importance of collaboration and a learning mindset. She stated, "To be a good employee, understand your work and do what is right for everyone. That is the secret to survive in corporate life”. She highlighted that her company values diversity, empowerment, and collaboration, which are crucial for corporate growth and development.

“MAKE YOURSELF BILLABLE TO GET HIRED”

Siksha O' Anusandhan addressed students' concerns about the future of work by opening the table on the agenda "Opportunities for New Graduates: The Importance of Academic Backgrounds versus Skills." Moderated by Mr. Sovan Mandal, CEO of *Valocity Global,* the panel analysed the value of academic credentials versus skills.

Ms. Janet Paul, Senior Director of HR at *Securonix*, highlighted that a learning attitude enhances academic proficiency. Furthermore, Mr. Ajay Baburao Ropalekar from *The Automotive Research Association of India* emphasised understanding industry foundations when choosing courses. Adding to this, Ms. Sneha Babbar of *Wabtec* stressed that reskilling and upskilling demonstrates a growth mindset and enhances emotional intelligence, communication, critical thinking, and analytical skills.

Mr. Danish Naseem from *Tredence Analytics* advised making oneself billable to get hired, meaning that the client, not the company, bears the cost. Commander Pratap Pawar, VP at *GSlab*, expanded on this. The panel agreed that while academic qualifications are crucial at entry levels, skills and upskilling become more important as careers progress. Ms. Nirupa Mary Jacob, Lead Recruiter at *VGuard Industries*, highlighted that skills have a shelf life of 4-5 years, necessitating constant upskilling. Ms. Binita Vipin, TA Specialist from *Reverie*, emphasised developing skills based on current market indicators.

The Fourth Industrial Revolution?

Numerous start-up opportunities, presented by The Fourth Industrial Revolution characterised by automation, data analytics, and smart technologies were highlighted in a recent forum on 'Industry 4.0' at SOA Proxima.

Mr. Sovan Mandal, CEO of *Valocity Global*, emphasised the importance of accessible data analytics tools. Additionally, startups could develop advanced Excel plugins or custom software to help businesses effectively manage their data.

Moving Mr. Rajesh Kumar Mittal, AVP at *Emami Paper Mills*, suggested creating specialised automation tools for industries like paper manufacturing. These tools could streamline processes and enhance efficiency. Mr. Kiran Kumar Panda, EVP at *Atul Limited*, highlighted the need for cybersecurity solutions as industries undergo digital transformation. Startups could focus on protecting manufacturing and chemical operations from cyber threats. Mr. Krupasindhu Roul, CIO at *Tube Investments of India*, advocated for online platforms offering industry-specific data science training and certifications, helping professionals stay updated.

Mr. B V K S S Prasad, AVP at *Grasim Industries*, talked about the need for real-time data collection and analysis systems in the energy sector. Such solutions could optimise performance and ensure seamless operations.

Adding to the discourse, Mr. Balakrishna Annapu, AD at *e2open*, suggested developing digital platforms and data visualisation tools to improve supply chain management, aiding informed decision-making and efficiency.

Startups could create tools to help industries incorporate better ESG practices, optimising environmental impact through real-time data analytics.

These ideas, derived from industry experts, highlight the intersection of technology, data, and industrial needs, offering fertile ground for innovation and startup development.

EXPLORING THE FRONTIERS: CHALLENGES AND OPPORTUNITIES IN GENERATIVE AI FOR FRESHERS.

Generative AI is a dynamic landscape for freshers that offers both challenges and opportunities. The frontier in artificial intelligence emphasises creating new content, from text to images. ChatGPT, a conversational AI by OpenAI with over 175 billion parameters, has sparked significant interest in higher education since its release in November 2022.

SOA had a dialogue over the topic "Challenges & Opportunities in Generative AI for Freshers" to explore both the issues and potential in Generative AI.

Mr. Paramveer Singh , India Lead, *Capital One* affirmed the sector's reliance on traditional methods for security, stating, "AI technology can't intervene in the sector I've been working in for years now." Adding to the agenda, Mr. Debabrata, VP(HR) at *MSPL*, highlighted AI's role in improving efficiency in the mining sector.

Introducing *Celigo India Pvt. Ltd.*, Mr. Naresh Reddy, Talent Ops Manager at the same, said -integration platform developing an AI chatbot for website navigation.

Mr. Subramanian S, Senior Lead(Early Talent Program) at *British Petroleum*, discussed the energy sector's untapped potential in the tech industry. Mr. Bhupesh Choudhary(Senior Manager-TA),*Extentia* stressed the importance of development and design in IT. Finally, Mr. Sriaravind T, *Veritas Technologies* (Manager) focused on cybersecurity and AI's role in neutralising modern threats.

These values will steer us towards a future where AI upholds integrity and serves humanity excellently.

FRESH PERSPECTIVES ON FRESHER HIRING

As technology advances, Generative AI raises the question: "Is it a threat to fresher hiring?" Industries must adapt to AI's influence on entry-level roles, highlighting the need for foresight.

A brainstorming session commenced in SOA on the topic "Is Generative AI a Threat for Fresher Hiring?". Ms. Suchandra Dutta , *Alif Semiconductor* (Dir.) emphasised AI training should be company-led. Adding to it , Mr. Guha Gundappa Venkatkrishna , *Dayforce India* (SM) noted AI simplifies HR but human insight remains vital.

Mr. Lokesh Raja, Manager (Early Careers & HR) at *Amagi Corporation*, recalled how AI's rise since the 1950s is now fuelled by significant investment. He further added that disruption isn't to be feared; it fosters adaptation and highlights a fundamental skills gap as "If you want the flower to bloom, first make the soil fertile."

Resonating to agenda , Ms. Ravina Raghuwanshi , *Philips(*Campus Recruiter),highlighted AI's benefits in healthcare.

Mr. Sachin J Taklekar from *EY India* stressed AI's role in driving innovation. Opening profoundly, Mr. Kunal Choudhury of *Alvarez and Marsal* (Associate Director),emphasises the importance of employee feedback and patience in freshers.

Mr. Shakti Mishra from *Daimler Truck* encouraged mastering subjects to steer interviews and highlighted AI as an enabler. Moderator Ms. Chandrima Sharma of *Standard Chartered Bank* ensured a balanced discussion.

Just as we've moved from the telegraph's tap to the smartphone's touch, connecting us instantly, we must navigate the shift from traditional hiring to AI-augmented workplaces.

AND THE NIGHT CONCLUDED

In the twilight's gentle embrace,
The event reaches its crescendo,
With all pomp and gusto,
Its essence lingering in the air.

The rhythm of the evening,
A metrical gambol,
Shimmering in moonlight,
Touches upon the fabric of social considerations,
Weaving an endless fabric of possibility.

Wisdom's pearls,
Strung in poetic lilt,
Illuminate the darkness,
Adding depth to the night's beauty.

As if the sun's hue spills,
Pooling upon the floor,
Embellishing the stage,
With potent renditions,
Each word, a brushstroke,
Painting stories of revolution,
Career's orientation,
And the struggles of student life.

The fragrance of flowers,
Permeates the air,
A symphony of scents,
Symbolizing the essence of change,
The budding of dreams,
And the perseverance in adversity.

In this gathering of souls,
Each moment holds a reflection,
Of life's grand theater,
Where each role, each scene,
Contributes to the unfolding drama,
Of existence.

Arrivederci!

The event culminated in a grand celebration.
The atmosphere was electric, shimmering under the moonlight with rhythmic performances, as if addressing every pertinent social concern.
With an exemplary exhibition of artistic persuasion on stage, everybody was moved.
The evening was infused with pearls of wisdom, strung in poetic lilt.
SOA Literary Club set the stage on fire with their odic prophecy.
The mesmerizing choreography from ODanza wove the narrative of women's concerns through stories of the Mahabharata.
Amidst the traditional makeover of the platform, Danza introduced vibrant pop and western brush strokes.
The event's success was further highlighted by a theatrical adaptation of a popular youth movie, emphasizing the core narrative of the Proxima process: gaining skills and viewing society as a point of positive impact.
Adding to the beauty, it was as if the sun's hue fell on the floor, embellishing the stage with potent renditions.
Overall, the stage resonated with the themes of revolution, career orientation, and the struggles of student life.

ACKNOWLEDGEMENT

A Heartfelt Thank You!

It was truly an honour to be a part of SOA PROXIMA. The experience was invaluable, offering us a glimpse into the dynamic and ever-evolving corporate tech world. Throughout the event, we had the privilege of delving into various aspects of the industry, enriching our understanding and broadening our perspectives. One of the highlights was the opportunity to engage with esteemed HR professionals from diverse sectors. These interactions provided invaluable insights into the intricate workings of different industries and the challenges they face, fostering a deeper appreciation for the interconnectedness of our professional landscape. SOA PROXIMA served as a unique platform where industries converged, fostering collaboration and facilitating the exchange of ideas. It was inspiring to witness the synergy that emerged when individuals from various backgrounds came together to share their knowledge and experiences.

As for the feeling, it was akin to being on a journey of discovery, where each session and interaction unveiled new layers of insight and understanding. There was a sense of excitement in the air, coupled with a deep sense of appreciation for the wealth of knowledge being shared. It felt like being part of something much larger than ourselves, a collective effort to navigate the complexities of the modern business world.

It has left an indelible mark on us, igniting a passion to continue exploring and learning in the corporate tech sphere. Thank you once again for this enriching opportunity.

With sincere gratitude,
